Every competitor's age and ability are different, and it is our job at Midwest Champ Karts to screen racers outside of the "required age". This is to try to eliminate one or more variables as they move up into the adult class. We understand some are ready at as early as 12 but it may not be the younger racer that is the problem. Older drivers may see this as a problem. We will be the policy owner so we can take the heat not your driver. This is for both parties to have a clear understanding of the expectations, difficulties, and screening that goes into a racer moving up a class. Most importantly making sure they are safe in the process.
